

DIANA TUROFF, CPA | President and CEO

DRIVING ECONOMIC DEVELOPMENT AND EQUITABLE ACCESS THROUGH CROSS-INDUSTRY COLLABORATION, THOUGHT LEADERSHIP, STRATEGIC PRIORITIES, AND ACTION.

“Diana presides over FCAP’s investment of \$450+ million, leveraging \$1.7 billion in economic development projects focused on small business, healthy food, healthcare, education, affordable housing, and community facilities.”

With more than 20 years of experience in business, finance, and accounting leadership, Diana possesses a wealth of experience and exposure to both for-profit and nonprofit environments.

Recruited to serve as Finance Fund & Finance Fund Capital Corporation’s first CFO, Diana spent her first 13 years with FCAP protecting and growing investments and assets. In addition, she championed strategic finance initiatives, ensuring financial health in order to achieve the organization’s mission and vision of creating jobs, affordable housing, and equitable access to education and healthcare for all Ohioans.

Promoted three times in as many years, Diana now serves dually as the President & CEO of Finance Fund and FCAP. Managing over \$450 million in investments, \$1.7 billion in projects, and 29 affiliate companies, Diana provides the thought leadership to advance the strategic initiatives of the organization, cultivate cross-industry relationships, launch new programs, and benefit the lives of hundreds of thousands of citizens.

Leading this statewide nonprofit community development entity to provide public and private capital to low- to moderate-income communities, Diana and her team focus on advancing equitable access, launching population-centered programming, and developing advocacy champions to fuel locally driven messaging and outreach. In addition, through her relationship management and interpersonal skills, Diana has been able to secure and deepen existing relationships across business, community, and political constituencies.

Earlier in her career, Diana was sought after as a financial consultant, working with multiple businesses to develop accounting infrastructures, establish controls, implement best practices and standards, and position organizations for financial efficiencies and effectiveness.

Prior, following receipt of her Bachelor’s degree in Accounting, Diana served as a corporate accountant, acquiring strong foundational experience performing as a finance and accounting generalist.

Always deeply interested in economic development, it did not take Diana long to find her home with FCAP. Spending the past 18 years of her 24-year career as a key member of the executive team, Diana is charting new courses within Ohio’s underserved communities, investing in people, projects, and businesses that provide needed services, good-paying jobs, and mission-critical resources.

Diana also gives back to her community through leadership roles with organizations focused on driving economic development, job growth, equitable access, and children’s rights.

Leadership and Involvement
